PROFESSIONAL SUMMARY

UX/UI designer with a B.A. in Psychology, Caltech UX Design & Research certification, and firsthand experience across high-volume talent acquisition, candidate screening, scheduling, placement, and onboarding. Brings recruiting-domain insight to user research, interactive prototypes, and accessible, transparent hiring experiences.

RELEVANT UX DESIGN, RECRUITING & RESEARCH EXPERIENCE

RoHealth | Behavioral Health Staffing Consultant | 2026 – Present

- Support high-volume hiring from job-posting outreach and candidate screening through interviews, scheduling, placement, and onboarding; understand recruiter and applicant pain points firsthand
- Track active candidate pipelines, document screening calls and next steps, and coordinate timely follow-ups by phone and text to keep applicants informed and moving forward.
- Coordinate provider availability, placements, and scheduling; maintain follow-up and exception reports to identify stalled applications, resolve discrepancies, and improve workflow clarity.

Zojer Studios - Kairos Astrology App | UX Research and UI Design Intern | 2026

- Interning for a startup app working closely with developers to revamp UI architecture and conduct UX research.
- Proposed UI improvement projects and improved user journey maps to ensure smoother publication of the App.
- Conducted User Research alongside a team publishing surveys and test prototypes, identifying pain points.

StarScore App Re-Design | UX/UI Contract Designer | 2025-2026

- Re-designed the entire end-to-end UI architecture for a client's app utilizing Figma, Maze and Typeform surveys.
- Ensured consistency with brand guidelines (typography, color, visual identity), independently conducted user research to identify key usability gaps, and create an overall smoother user journey.
- Successfully passed a high-fidelity design over to developers to be implemented.
- Maintained marketing responsibilities by independently curating social media posts using Canva.

UW Psychology Department Internship | Research Assistant | 2022-2023

- Taught college peers how to code in Python for a psychology research study on memory and learning.
- Proficiency in Microsoft Office/ Excel & Word and BlueSky Statistics in maintaining datasets, research design, and organizing data for academic publication. Ensuring consistently accurate data entry and record keeping.

Acres of Diamonds Internship | Human Factors/ Psychology Intern | 2021

- Applied psychology background to implement Trust-Based Relational Intervention (TBRI) techniques and trauma-informed care for diverse high-risk children impacted by homelessness and domestic violence.
- Managed referrals and progress documentation using Microsoft Excel/ Word with high attention to accuracy and HIPAA confidentiality. Coordinated between therapists and staff to ensure efficient case tracking.

SELECTED UX PROJECTS

Fashion App Prototype | CalTech UX Bootcamp | 2025

- Full app design for final class project which showcased skills in typography, UX writing, color theory, visual compartmentalization, and detailed interactive design prototypes.

UX Research Case Studies | CalTech UX Bootcamp | 2024-2025

- Evaluated user journeys for Target, Amazon, and DoorDash; developed personas and journey maps, conducted interviews and surveys with diverse focus groups, analyzed user centered data collection, and proposed redesign concepts – all while considering market analysis and stakeholder handoff.
