TALIA HIJAZI

UX RESEARCHER | PSYCHOLOGY | E-COMMERCE AND RECRUITING INSIGHTS
(425) 623-2402 | hijazistalia@gmail.com | Portfolio: https://hijazistalia-lang.github.io/tiktok-ux-research/

PROFESSIONAL SUMMARY

UX researcher with 1+ year of combined contract, internship and academic research experience, supported by a B.A. in Psychology and a Caltech UX Design and Research certificate. combining mixed-methods research, experience analyzing qualitative and quantitative data, and consumer/ market analysis. Experienced in conducting interviews, facilitating surveys, usability testing & studies, questionnaire design, journey mapping, data analysis, focus groups, and translating findings into practical recommendations for improved product and workflow decisions.

RESEARCH METHODS AND TOOLS

Methods: User interviews, surveys, focus groups, usability testing, concept evaluation, personas, journey mapping, qualitative synthesis, quantitative analysis, foundational and competitive research

Tools: Figma, Maze, Typeform, Python, BlueSky Statistics, Excel, Adobe Creative Suite, Canva

SELECTED UX DESIGN & RESEARCH PROJECTSS

Boys and Girls Club of Washington State Website Re-Design and UX Research | Seattle Give Camp | 2026

- Collaborated with Executive Jessie Bustamante to rebuild the nonprofit website following a security breach.
- Conducted competitive analysis of three websites to identify UX best practices and ensure brand consistency with Boys and Girls club. Performed user research, journey mapping, and usability testing to identify key features and ensure efficient user experience.
- Created wireframes translating research insights into intuitive designs and ensuring successful handoff to web developers.

Retail and E-Commerce Research Case Studies | Target, Amazon and DoorDash | 2024-2025

- Conducted market and competitive analysis across Target, Amazon and DoorDash to examine consumer shopping and delivery behaviors, identify journey friction and translate findings into prioritized product recommendations.

Fashion E-Commerce App Prototype | Caltech UX Program | 2025

- Designed an interactive shopping experience using user flows, UX writing, information hierarchy, visual design, and high-fidelity prototyping in Figma with clickable buttons.

RELEVANT EXPERIENCE

Ro Health | Behavioral Health Staffing Consultant | 2026-Present

- Research candidate and provider needs through screening interviews, recurring outreach, and feedback collection across high-volume recruiting, placement, onboarding, and scheduling journeys. Creating smoother experiences for candidates and recruiters.
- Track pipeline activity, availability, placements, and follow-up outcomes in operational reports; identify friction points and recommend workflow improvements that make the applicant and provider experience clearer and more accessible.
- Write and market job postings, incorporating sales to open new markets with clients in various states, provider and candidate management, and communicate findings and next steps to recruiting and operations partners in a fast-paced environment.

Zojer Studios - Kairos Astrology App | UX Research and UI Design Intern | 2026

- Collaborated with developers and design partners to define research questions, publish surveys, test prototypes, facilitate a multitude of A/B testing, backing up suggestions with direct user research, and identify user pain points for a live startup application.
- Synthesized feedback into journey-map and information-architecture improvements, proposing practical UI changes to support a clearer and smoother end-to-end experience for professional astrologer usage.

StarScore App | UX/UI Contract Designer | 2025-2026

- Independently re-designed the entire UI structure for a startup app. Planned research using interviews, Maze testing, and Typeform surveys to identify usability gaps and guide an end-to-end mobile-app redesign that incorporates informed decision making.
- Helped define research questions and select surveys, prototype testing and concept-evaluation methods based on project goals, timelines and available resources. Communicating prioritized product changes with implementation-ready Figma prototypes.

University of Washington Psychology Department | Research Assistant | 2022-2023

- Supported research on memory and learning through study design, accurate dataset maintenance, statistical analysis in BlueSky, and written and spoken communicational skills in translating data for academic publication.
- Taught peers foundational Python coding and communicated research procedures clearly across varied technical skill levels.

ADDITIONAL RESEARCH EXPERIENCE

Acres of Diamonds | Human Factors and Psychology Intern | 2021

- Applied trauma-informed psychology HIPAA-compliant clinical documentation and referral management, optimizing operational workflows between therapists and staff, and coordinating with therapists and staff to communicate case tracking and curate BIPs.

EDUCATION

B.A. Psychology | University of Washington, Seattle | 2020-2024 | GPA 3.8/4.0; Dean's List
UX Design and Research Certificate | California Institute of Technology | 2025

ADDITIONAL QUALIFICATIONS

E-commerce UX research | Merchant and customer journeys | E-commerce journey analysis | Cross-functional collaboration | Product strategy | User behaviors and attitudes | Research planning | Questionnaire design | Concept tests | Diary studies | Actionable insight synthesis | A/B testing | Foundational and industry research | Cross-functional collaboration | Independent project ownership | Multiple concurrent projects | Python | Java | Independent project ownership | SPSS | BlueSky Statistics | User behaviors and attitudes | Usability and concept testing | Excel
